**BUILDING PRODUCTS THAT IMPROVE  
THE DAILY EXPERIENCE OF CABLE  
INSTALLERS.**

At its core, VelociWrapper® is more than just a company building machines—we're a team on a mission to empower the industry with smarter, more efficient solutions.

VelociWrapper® provides the ONLY cable installation products that are safer, faster, and more cost-effective. Whether it's cutting costs, increasing efficiency, or improving jobsite safety, our goal is to serve everyone from installing contractors to end-users.

By making installs faster, easier, and more cost-effective, we're not just improving projects—we're shaping the future of cable installation.

# VELOCIWWRAPPER®

TOOLS TO INNOVATE YOUR CABLE INSTALLS.

# The Products

## VelociWrapper®

Engineered for underground MV cable installation on wind and solar farms, the VelociWrapper® operates without motors, engines, or electronics—relying solely on forward motion to wrap cables or conduits with three strands of wrap cord. This ensures a consistently tight bundle at 1/10th the cost of zip ties, all while dramatically increasing efficiency.

## Fairlead

Designed with a skid-steer quick attach plate and fork pockets, the Fairlead efficiently moves cables from the ground into the trench after wrapping. Keep your excavators digging, not hauling cables, improving jobsite productivity.

## Trailer

A compact transport solution, the VelociWrapper® Trailer connects behind a reel trailer when direct mounting isn't an option. It also easily transports the VelociWrapper® and Fairlead, towable by a pickup truck, making it ideal for rental companies.

## Research & Development

Our team of engineers is dedicated to solving cable installation challenges through cutting-edge innovation. Focused on wind and solar farm applications, we identify industry pain points and develop solutions that save time and money.

Beyond creating new tools, we ensure seamless integration into company workflows, offering custom attachments and modifications to meet unique jobsite needs. Our team works directly with customers to maximize field efficiency.

“Our job was going to be 400% over budget and because of your VelociWrapper® system, we came in under budget. It’s my job... I know!”

**DIRECTOR OF ENGINEERING**  
California Job-site | 600+ MW Solar

“These machines sped up our total job by 25-30%!”

# The Ultimate Tool For Safer, Faster, & More Cost-Effective Cable Installs.

## Faster & Hands-Free

Wrap at 4 MPH (6.5 KPH) and place cables directly into the trench without manual handling when used with the Fairlead.

## Zero Emissions, Zero Hassle

No motors, fuel, or electrical hookups—just mount and start wrapping.

## Safer Jobsites

Less trench exposure, reduced heavy lifting, and lower risk of injuries for your crew.

## Stronger, Tighter Wrap

Consistent 6-8 inch (15-20 cm) spiral wrapping keeps cables secure and eliminates voids.

## Versatile & Precise

Wrap 1-3 inch (2.5-7.5 cm) cables and include ground wires or fiber optics for smaller trenches and bores.

## Zip Tie
